

# Uppara Veeranjanyulu

Yemmiganur, Andhra Pradesh — +91 9848267497 — uupparaveeranj@gmail.com

LinkedIn — GitHub — LeetCode — Portfolio

## Profile

Computer Science undergraduate with strong foundations in programming, Data Structures and Algorithms, DBMS, Operating Systems, Computer Networks, and Software Engineering. Hands-on experience developing full-stack applications, REST APIs, database-driven systems, distributed applications, and cloud-deployed solutions. Proficient in JavaScript, Python, Java, C++, SQL, React.js, Node.js, and modern development tools. Strong interest in AI, cloud computing, digital transformation, and continuous learning.

## Education

|                                                             |                   |
|-------------------------------------------------------------|-------------------|
| <b>Amrita Vishwa Vidyapeetham, Coimbatore, Tamil Nadu</b>   | 2023–2027         |
| B.Tech in Computer Science and Engineering                  | <b>CGPA: 7.45</b> |
| <b>Narayana Junior College, Hyderabad, Telangana</b>        | 2021–2023         |
| MPC                                                         | <b>98.2%</b>      |
| <b>Narayana E.M High School, Yemmiganur, Andhra Pradesh</b> | 2020–2021         |
| SSC                                                         | <b>100%</b>       |

## Projects

### CraveQuick – Full-Stack Food Delivery Platform *Full Stack*

- Developed a multi-role food delivery platform supporting Consumer, Partner, and Admin workflows using responsive React interfaces.
- Built Node.js REST APIs for user, restaurant, order, and application management with MongoDB for persistent data storage.
- Integrated Socket.io for real-time order and location updates and Razorpay for online payment processing.
- Technologies:** React.js, Node.js, MongoDB, Socket.io, REST APIs, Razorpay, JavaScript

### Polyverse – Federated Social Network *Distributed Systems*

- Developed a federated social networking platform using ActivityPub to enable communication between independently operated servers.
- Built application components using SvelteKit, TypeScript, Fedify, and PostgreSQL with focus on distributed communication and data ownership.
- Implemented federated identity, server-to-server communication, and secure key management concepts.
- Technologies:** TypeScript, SvelteKit, Fedify, ActivityPub, PostgreSQL, Tailwind CSS

### ThinkBoard – REST API and Distributed Rate Limiting *Backend*

- Developed a RESTful note management application using Node.js, Express.js, and MongoDB with complete CRUD API operations.
- Implemented Redis-based distributed rate limiting to control API traffic and improve reliability under concurrent requests.
- Tested API workflows using Postman and maintained the project using Git.
- Technologies:** Node.js, Express.js, MongoDB, Redis, REST APIs

## Technical Skills

**Programming:** Java, Python, C, C++, JavaScript, TypeScript, SQL

**Core CS:** Data Structures & Algorithms, OOP, DBMS, Operating Systems, Computer Networks, Software Engineering, System Design

**Web & Backend:** React.js, SvelteKit, Node.js, Express.js, Flask, HTML5, CSS3, REST APIs, Socket.io

**Databases:** MongoDB, PostgreSQL, MySQL, SQLite, Firebase

**Cloud & Tools:** AWS, Docker, Git, GitHub, Linux, Postman, VS Code, Vercel, Redis

**AI & Data:** Machine Learning, Deep Learning, TensorFlow, Keras, Pandas, NumPy

## Certifications

|                                                        |          |
|--------------------------------------------------------|----------|
| <b>Supervised Machine Learning – Coursera</b>          | Sep 2025 |
| <b>Oracle Cloud Data Science Professional</b>          | Oct 2025 |
| <b>AWS Cloud Foundations</b>                           | Aug 2025 |
| <b>Deloitte Data Analytics Job Simulation – Forage</b> | Aug 2025 |

## Honors and Achievements

### GeoGuide Agentic AI Hackathon – Top 5 Finalist *Feb 2025*

- Ranked among the Top 5 teams out of 100+ teams for developing an AI-powered API-based travel recommendation system.
